

NEW PROGRAM ANNOUNCEMENT!

Managing Projects in a LEAN or SIX SIGMA Environment

Presented by: Pam Nintrup, PMP, CSSMBB, CCP

September 9, 2010

This one-day, practical workshop is targeted toward developing LEAN or Six Sigma process improvement project leaders. It builds on the foundation of LEAN and Six Sigma basics that participants should have prior to the workshop. Students will be asked to bring a "live" process improvement project and we will develop a clear project definition and get a great start on an actual project. Upon completion of the workshop, students will have confidence in their ability to successfully manage a LEAN or Six Sigma project from beginning to end.

Program Fee: \$350

Program Location: Voice of America Learning Center in West Chester, OH
Program Syllabus & Lean/Six Sigma Program Schedule Attached
